## UNITED FARMERS DRAFT PLATFORM AT CONVENTION

Only Fraction of Resolutions  
Are Dealt With—Want  
A.P.P.

During the closing hours of the U.F.A. Convention at Calgary last Friday evening, a somewhat heated demand for a provincial polling system was put forward. Delegates spoke for the return of the old A.P.P. force, to replace the R.C.M.P. polling system. As the convention came to a close at 11:30, more than 150 resolutions which had been drafted for consideration at the annual meeting, were left for the attention of the executive.

A high light of the annual meeting was the association's lengthy consideration of the Aberhart plan of social credit. In spite of Mr. Aberhart's appearance at the convention, and an eloquent appeal for support, the plan was rejected by an overwhelming majority.

Adoption of a 12-point "program" or set of principles to be immediately enacted where possible and comprising the appeal of U.F.A. candidates to the people in the coming election.

Approval of certain of the Dominion government's "reformed" legislation such as the Natural Products Marketing Act, etc., and acceptance of various financial reports coupled with election of officers, directors and the 1935 executive.

### Complete "Program"

The six planks of the platform passed during the session related to education, highways, public health, industrial development administration and justice and public ownership. They follow:

### Industrial Development

1. Full co-operation by the department of industry with all branches of trade and industry to eliminate evils of excessive competition and insure fullest development of provincial trade.
2. Reorganization of the coal industry looking to better development.
3. Extension of markets for industrial products of Alberta.

### Education

1. That the basis of our educational system be changed so as to reach our children to place human and spiritual values above property values, and that the subjects of citizenship and political science particularly should be so presented as to stimulate the will of our youth toward the solution of our present ills, rather than the fatalistic acceptance of them.

2. That as rapidly as possible steps be taken to equalize educational opportunities in the provinces.

3. That the government take steps to make available the facilities of our higher educational institutions of learning by scholarship, or bursary, or otherwise, to such young persons of the province as show themselves capable of exceptional achievement.

4. That the government be requested to take the necessary steps for a system of adult education similar to the folk schools of Scandinavia.

### Public Health

Expansion of the existing public health services, looking toward the ultimate objective of complete state medicine.

### Highways

Continuation at as rapid a rate as possible of the policy of progressive highway construction, with particular regard to the orderly development of local and market roads.

### Administration of Justice

1. Complete revision of rules of court and simplification of court procedure to reduce costs of litigation.

2. Formation of arbitration tribunals to which disputes may be referred without the usual court formality.

3. Establishment of the office of public trustee.

4. Setting up of a system of domestic relations courts.

5. Extension of the "Needy Litigants Act."

6. Continued study and application of constructive methods and information in the treatment of prisoners.

7. Provision for better supervision for juvenile offenders and delinquents.

8. Provision for bonding of any person or persons handling trust funds.

### Public Ownership

We endorse the principle of public ownership of all utilities used in common and natural resources which are in the nature of monopolies. These should be brought under public ownership and control. We also endorse the principle of private ownership of property in individual use.

Recognizing the limited powers of the province with respect to public ownership, we pledge ourselves to co-operation with the Dominion government with a view to the most rapid progress toward these ends.

## WOMAN'S DEATH AT FARM HOME INVESTIGATED

William Hawryluk Youngstown, Under Arrest—  
Murder Charge

William Hawryluk, age 42 years, farmer in the Youngstown district for some 20 years, is under arrest charged with the murder of his wife, Helen Hawryluk, age 36 years, following a quarrel which is alleged to have taken place at their home on Thursday morning January 17.

The first intimation received that anything was wrong at the Hawryluk home was on Monday when a neighbor, Otto Gottlick telephoned Const. Murphy, R.C.M.P. at Oyen that Hawryluk had reported to him that his wife was dead.

Responding to the call Const. Murphy reached Youngstown late Monday evening on a freight train. He left immediately by team for the scene of the tragedy and returned to Youngstown at two o'clock in the morning with the prisoner and the body of the dead woman. Const. Hanna of the local detachment R.C.M.P. was also called and left immediately by train for Youngstown. It is believed that Hawryluk struck his wife on the head with some blunt instrument, put her out in 45 below zero weather where she died either from severe wounds inflicted or from exposure.

The Hawryluk home is situated about sixteen miles north and west of Youngstown, with the roads blocked with snow and no telephone communications.

An inquest is likely to be held this afternoon with Dr. Cross of Hanna, coroner in charge, to determine the woman's death. Const. Murphy and Const. Hanna are still in Youngstown continuing further investigations. A post mortem examination is also pending. There are six small children in the Hawryluk family, ranging from 3 to 12 years of age, who are now being cared for by neighbors in the district.

The Ladies Card Club met this week at the home of Mrs. Lee Honors went to Miss Joan Bayley and Mrs. S. Meeres. The Club will meet next week at the home of Mrs. E. C. Pfeiffer.

Mrs. Geo. Connell visited on Tuesday at the home of Mrs. Wm. Milligan

...

Mrs. M. C. Nicholson who attended the Alberta Press Convention which was held at the Palliser Hotel, Calgary, last week, returned on Tuesday.

...

Ben Gray left for Olds Wednesday night.

...

Mrs. Loader is receiving medical treatment in Hanna this week.

...

Mrs. Steadman and children returned to Innisfail Tuesday night.

...

The present lovely spell of fine weather is surely acceptable after the long and severe winter we have had,

On Saturday last Jan 25th the Chinook boys journeyed to Cereal for their first hockey game of the season.

While the game was not altogether an exhibition of sparkling hockey, there was much evidence of promising material for future games.

Play was very even during most of the game, Cereal getting the long end of a 7-5 score.

A return game is expected this Saturday afternoon at Chinook. The boys will appreciate your support. They have worked hard, early and late, to keep the rink in condition and deserve much credit for their efforts.

A particularly strenuous practice game was played on Tuesday between mixed teams of men and boys resulting after a good deal of overtime in a win for the seniors, although many players alternated on either side.

The play showed much improvement among the junior element.

Practices will continue on Tuesdays and Thursdays at 4 p.m. also Saturday afternoons.

The Alberta Legislature is meeting Thursday Feb. 7th, where there will likely be much important business for its final session before the Provincial Election.

## How To Keep Colds UNDER *better* CONTROL

When Colds THREATEN

**VICKS VA-TRO-NOL**  
At the first sneeze or nasal irritation, quickly a few drops of Vicks Va-tro-nol. Its timely use helps to prevent many colds, and to throw off colds in their early stages.

If a Cold STRIKES

**VICKS VAPORUB**  
At bedtime, massage throat and chest with Vicks Vaporub, the mother's standby in treating colds. All night long, by stimulation and inhalation, Vaporub brings direct relief.

To Build Resistance to Colds: Follow the rules of health that are part of the clinically tested Vicks Plan for Better Control of Colds. (The Plan is fully explained in each Vicks package.)

**VICKS PLAN FOR BETTER CONTROL OF COLDS**

### Appraisals Of Progress

"If we are to take stock of the world's advance in 1934, let us first take stock of ourselves."

With this challenge to the conventional New Year appraisals of progress, Dr. Robert A. Millikan, distinguished scientist and Nobel Prize winner, contributes to the January American Magazine what is described in an editorial review in "The Reader's Digest" as one of the truly stimulating articles of the month.

It is stimulating, and for that reason we utilize this column to reproduce The Reader's Digest editorial review of Dr. Millikan's article. It says: Dropping for the moment his famous pursuit of the cosmic ray, Dr. Millikan seeks for rays of hope in the cosmos of human aspirations. The usual end-of-the-year statistics on car loadings, steel output and building construction, he says, only blind us to the real fundamentals of mankind's advance. Records of transportation are important, but not so important as whether the men who last year used our wanted methods of eating space were more thoughtful and kind than those who were transported the year before. We may boast how speedily we got about and forget how to walk peacefully and reflectively with ourselves.

The number of miles traveled in automobiles is not as significant as what we saw and felt on our way. Did we hog the road and give battle to crossings, or were we chivalrous as knights? How many bumps did we grant with our cars to the old, the lame, the shut-in? And "how many times did we drive alone to a hilltop to read and to meditate, hungering for betterment?" Just as human values transcend statistics, so we must use the golden rule to measure true progress.

Our improved communication, whether by radio, telephone, or transatlantic cable, does not of itself denote a higher civilization. The main question is: What was communicated? Fear and prejudice? Did our remarkable facilities tend to promote hate and greed, base ideas and false sentiments? Or did they reflect sounder thinking, more generous and humane impulses?

What if we did make a staggering number of telephone calls or talk freely to London and Paris? That is of small moment compared with whether or not we used the telephone as an instrument of fellowship. Did we call and offer to help a friend smitten by ill luck? Were we less rude and intolerant? There was no progress if we growled in the marketplace and failed to employ the phone for more intelligent, gracious conversation. The fact that some of our tall buildings are gloomy and half occupied because really they are the mindless things those who use them become gloomy and half occupied, too. Not the number of new buildings that go up but what goes on in them is the vital standard. Do new buildings connote better working conditions and larger opportunities?

Let us not be deceived by the products of our farms and factories. The supreme question is, did we grow in mental, moral and physical stature? Not how fast the wheels turned in 1934, but "how slow and firm were the feet of thoughtful men upon the earth." Not how much improvement in motor design, but how much we improved the motor of men—the knowledge, the understanding, the purpose."

Stratosphere flights were made in 1934, but what of the aspirations of those who remained below? "In 1935, perhaps," Dr. Millikan writes, "if we are thoughtful and honest and kind and courageous, we may ascend a little way toward our own stratosphere—the mysterious altitudes of ourselves."

### Wanted Bells Used

Unless They Were Donor Would Not Attend Church

Antonio Giovanni Rebagliati, pioneer merchant of the Cariboo, has heard the peal of the bells he longed many years ago to the church in Lynton, B.C., and has returned to worship with his neighbors.

For many years the bells had not been rung because residents complained of the noise. "Ring my bells or I do not go to church," said Rebagliati. At last his words have been heeded, the bells have been rung on Sundays and the merchant attends church regularly.

Football coach (to players): "And remember that football develops individuality, initiative and leadership. Now get in there and do exactly as I tell you."

Mountain goats are increasing in Mount Rainer National Park, Washington.

### Kidney Troubles

cause poisons to accumulate in the blood and bring on rheumatism, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to a healthy condition and eliminate the poisons from your system.

## Royal Bank of Canada Presents Strong Statement

Morris W. Wilson, President and Managing Director, Notes Distinct Improvement in Business—Looks Forward to 1935 With Confidence.

Sydney G. Dobson, General Manager, Reviews Financial Statements—Reports \$50,000,000 Increase in Deposits

At the Sixty-Sixth Annual Meeting of The Royal Bank of Canada, held in Montreal, Morris W. Wilson, President and Managing Director, paid tribute to the distinguished group of shareholders gathered to the bank by Sir Herbert Holt, who had presided at successive Annual Meetings for over a quarter of a century, and whose outstanding ability and prestige have been important factors in the sound and consistent growth of the bank during his regime.

In commenting on the strong Statement presented to the meeting, Mr. Wilson said that it reflected a year of operations under distinctly improved conditions, both at home and abroad. Referring to the recent revision of the Bank Act and the Act incorporating the Bank of Canada, he stated that at the public hearings preceding these enactments the bank was able to justify their administration. He warned that the curtailment of earning power resulting from restrictions upon interest rates, comparable by banks and the withdrawal of note-issuing privileges will inevitably reduce the ability of banks to maintain unproductive branches in small communities. Banking profits have never been excessive, and if an efficient banking system is to be maintained, there is a point beyond which enforced economies to meet falling revenues on one hand, and increased taxation on the other, cannot safely be carried.

Referring to taxation, Mr. Wilson said:—"For every dollar paid in dividends last year we paid sixty-seven cents to the Canadian tax-gatherer. This does not take into account the income paid by our shareholders on their shares on dividends received from the Bank. Surely these figures require no comment."

In discussing the improved conditions in Canada, Mr. Wilson pointed out that during the past year manufacturing and employment have approximated the levels of 1929, and steel production, the output of automobiles, textiles and electrical energy had increased, and the value of exports, notably lumber and minerals, had advanced substantially. The wheat crop was no larger, but, fortunately, higher priced. The value of field crops had increased over \$100,000,000 and the enhanced purchasing power of the farmers had stimulated trade in Canada. To try. There has been increased demand for Canadian mineral products and it is anticipated that the output of Canadian gold will exceed \$100,000,000, as compared with \$85,000,000 in 1933. The building boom in Great Britain created unprecedented demand for Canadian lumber and a record volume of shipments has been made during the past year. He mentioned the important increase in tourist trade to Canada, which had amounted to over \$300,000,000 a year and for several years brought more money into Canada than our wheat exports.

### Newsprint

"Demand from the United States for newspaper has been strong, with the result that the output of the Canadian mills in 1934 was more than twenty-five per cent. higher than in the previous year. In fact, it was within five per cent. of the peak level of 1929. Prices, however, were even lower than in 1933 and, despite the most rigid economies, operations have continued on an unprofitable basis."

### The Railway Situation

"The railway situation continues to be the most important economic problem in Canada. Obviously, the Canadian people cannot stand indefinitely a weekly drain of over \$10,000,000 for railway deficits, and the time is rapidly approaching when more drastic and effective action will have to be taken if we are to maintain national credit and solvency."

Referring to world affairs, the President said that in spite of losses and several other countries was greater than in 1928.

"It is only in the countries of the gold bloc where business has become materially worse during the year. World trade, however, must be released from the multitude of new restrictions which were among the worst products of the depression. If it is to regain healthy vigor. Excessive economic nationalism has proved a dangerous boomerang, striking down home industries as well as those of foreign countries. I believe that the pendulum of opinion has begun to swing toward better economic relationships between countries, and I look upon this new attitude as a happy augury of further favourable developments during the coming year."

### The Capitalist System

"It is not surprising that new social experiments should have been undertaken in many countries in the hope

of mitigating the suffering incidental to violent booms and depressions. Undoubtedly, the war placed a great strain upon the capitalist system. That system has been the result of a process of evolution and as such has been subject to modifications from time to time to meet changing conditions. Further modifications and changes may be a necessity if we are to be rid of the evils of major depressions. The difficulties in the distant past were the outcome of shortages. At the present moment the major difficulties have to do with the distribution of an increasing surplus which tends to exceed purchasing power. Increasing attention must be given to measures which will provide for a few more and more even in the exchange of goods and services. Insofar as the "New Deal" in the United States, or economic experiments in other parts of the world, may provide a workable answer to this problem, we should not hesitate to profit by that solution. Social and economic experiments which fail, however, are usually costly and it is prudent and wise to "make haste slowly" in changing such problems in a rational manner. That system has been the result of a process of evolution and as such has been subject to modifications from time to time to meet changing conditions. Further modifications and changes may be a necessity if we are to be rid of the evils of major depressions. The difficulties in the distant past were the outcome of shortages. At the present moment the major difficulties have to do with the distribution of an increasing surplus which tends to exceed purchasing power. Increasing attention must be given to measures which will provide for a few more and more even in the exchange of goods and services. Insofar as the "New Deal" in the United States, or economic experiments in other parts of the world, may provide a workable answer to this problem, we should not hesitate to profit by that solution. Social and economic experiments which fail, however, are usually costly and it is prudent and wise to "make haste slowly" in changing such problems in a rational manner.

### The Outlook

"For more than a year and one-half there has been a distinct upswing in business activity; improvement has been general in practically all branches of agriculture, industry, mining and trade. At the beginning of the year the outlook was gloomy at home and abroad, favor a continuation of this upward trend. It is true that in Canada there remain a number of difficult problems for which practical solutions are necessary, but I believe that the Canadian people have the courage and ability to solve such problems in a rational manner. It is upon the basis of past performance that I look forward to 1935 with renewed confidence."

**GENERAL MANAGER'S ADDRESS**  
In his remarks, Mr. G. S. Dobson, newly appointed, General Manager, referred to the very satisfactory nature of the Annual Report and Balance Sheet presented. He said in part:—"After several years of declining figures, due to general conditions, I am glad to say the trend has not only been reversed, but public most headings has been reversed, in some instances to a substantial degree."

In reviewing the Financial Statement, he said:—"Perhaps the most gratifying feature of the Balance Sheet of Canadian gold mine production in total deposits by the public. The total is now \$612,579,453. Canadian branches contributed \$41,000,000 to the total. The balance sheet shows a total of \$11,000,000 in the Savings category. It is interesting to note that an increase in deposits was shown by every province, and, in fact, the savings of the north-seeking or north pole."

"Current loans in Canada show an increase for the first time since 1929, and are up over \$100,000,000. This is a significant change, reflecting, as do other items in the Balance Sheet, a heartening increase in Canadian business activity."

Mr. Dobson pointed out that all banks in Canada, because of their easy cash position, are looking for desirable loaning business, and the comparatively small increase under this heading reflects a lack of demand for loans, rather than a restriction of credit.

"Profits for the year were \$4,398,217 but are not properly comparable with published profits for the previous year because hereafter they were reported after deducting Provincial taxes but before Federal taxes. For the sake of uniformity, and the value of the business, the holders, both classes of taxes are now disclosed in the published report. Making allowance for the resulting increase in the value of the business, the profits are lower by \$288,448, leaving \$1,560,804 to be carried forward in Profit & Loss Account, after the usual deduction for dividends, taxes, etc."

"In keeping with the downward trend in interest rates and the resulting difficulty in employing funds profitably, the banks and most other institutions accepting deposits reduced their rates on interest-bearing accounts 1/2 of 1% from November 1, 1934. This has had a beneficial effect upon bond prices, and has helped to reduce the cost of Dominion and Provincial financing."

Mr. Dobson made special reference to the satisfactory results achieved by the branches outside of Canada in the value of the business, and he gave to exporters in the development of their trade in the countries where the bank is represented.

"On the whole, 1934 may be regarded as a year of substantial recovery in the value of the business, we have many problems to solve, but I believe, every justification for looking forward with confidence to a further improvement in conditions during 1935."

### Perishes in Cold

Saskatchewan old claimed the life of Percy Ochapaway, 14-year-old Indian, who died of pneumonia at Round Lake, Ochapaway and two other Indians without permission left the school and started for their homes some miles away on January 13. The other Indians returned, but Ochapaway's body was found January 17.

### Little Journeys In Science

#### MAGNETISM

(By Gordon H. Guest, M.A.)

In various countries there is found an ore of iron which has the power of attracting small bits of iron. Pieces of this ore are known as natural magnets. The name for this particular kind of iron ore was decided upon because large quantities were found near a town in Asia Minor called Magnesia. The natural magnets not only attract small pieces of iron and steel but they also possess the power of indicating direction.

If a piece of steel is stroked by a natural magnet it becomes itself a magnet. There are, of course, other and more convenient ways of magnetizing a piece of steel. Permanent steel magnets include the bar magnet, the horseshoe magnet and the compass needle.

If iron filings are scattered over a paper upon which is a bar magnet it will be found that the iron filings arrange themselves in curved lines about the shape of the magnet. It will be observed that these lines curve into the end or near the ends of the magnet. If the bar is suspended by an untwisted string it will come to rest with one end pointing a general north direction. This end is known as the north-seeking or north pole.

The space surrounding a magnet in any part of the world where the force of the magnet can be detected is called its magnetic field. It can be shown that the magnetic force is greatest in the neighborhood of the poles. The lines of force belonging to a magnet are considered to commence at the north pole, pass through the surrounding space, enter at the south pole and continue through the magnet from the south to the north pole. Thus every line of force is a closed curve.

The fact that a compass needle points approximately north and south (2 1/2 degrees east of north) indicates that the earth is surrounded by a huge magnetic field having a south pole near the geographical north pole and a north pole near the south geographical pole because it has been agreed upon by scientists that the pole which points to the north should be called the north seeking pole.

### If Both Are Young

Chances Of Survival Until Golden Wedding One To Six

The chances a newly married couple have of surviving to celebrate their golden wedding anniversary have been removed from the realm of doubt and put into an absolute category by statisticians of the Metropolitan Life Insurance Company, according to a company bulletin.

When the bride is 22 and the bridegroom 25 years old, which is about the average example, it was found that they have approximately one chance in six of living out their fifty years together.

"The chances of this same couple surviving to their silver wedding is, of course, very much greater," the statisticians say: "in fact, their chance of reaching their tenth anniversary is not far from certainty, namely, 927 per 1,000, or considerably in excess of nine in ten."

Many New York, who were moved to make their calculations by the growing number of marriages accompanying the approach to better business conditions of nine in ten.

### Build Up Great Business

Montreal's new knight, Sir Charles Lindsay, was stricken with blindness when 19 years old. His spirit rising magnificently above this affliction he became a piano tuner, began to sell pianos, built up a great business, and incidentally amassed the fortune that is the basis of his splendid philanthropy.

## THE TENDERFOOT

By  
GEORGE B. RODNEY  
Author of "The Coronado Trail,"  
"The Canyon Trail," Etc.

### SYNOPSIS

"You're fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling four-glass cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding fence a long way from the four-glass ranch house.

Dustin unexpectedly comes along and seeing them, stops and talks to Phil. He mentions the Soda Springs dispute could be settled by marrying him, and Edith receives his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Carr, who, for a moment, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Carr go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he took from it.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Pryor Gregg, a drug addict, who, stung by the narrative he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Keene and Stone speculate as to the meaning of entries in the notebook belonging to Dad Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory.

(Now Go On With The Story)

### CHAPTER X.—Continued

"Seven what...?" she demanded.

"What was he measuring by?" Stone dragged out his watch, laid it on a rock and deliberately set about rolling a cigarette.

"I may be all right," he said. "I may be just a fool but it occurred to me... Well! Listen... You see old Kane, being a desert-rat, never carried any mensurin' tape line. He probably doesn't even use a watch. Hardly any of 'em do. They tell time by the sun. Of course that distance can't be paces. It isn't miles because he has no way of estimating how far a mile is. What can it be? You guess..."

But Edith shook her bright head and watched him. He grinned at her.

"I guess cigarettes," he said. "I've heard it's a common way along here, and below the Border and in Mexico it can't hurt any to try it and see."

"Seven one, would be the distance he would travel in smoking seven and one-tenth cigarettes. You take this cigarette and time me while I smoke this cigarette..."

"I mustn't hurry through it, you know. I've got to smoke it in the leisurely way old Kane smokes when he's hoodin' along behind his jackasses at about a mile and a half an hour."

"That's a little better than that," she laughed, "but you may be right. It can't hurt any to try. Give me the watch."

He sat on a rock at her feet and in between puffs at that cigarette he studied her profile as she kept her eyes on the watch.

"Seven minutes and a half," she said finally. And neither of them knew that in those seven minutes Fate had dealt a new hand to them both.

"That's good. That makes about forty-five minutes up Red Water canyon to a white birch. While birches ought not to be very plentiful in this land. Let's go. We'll lead the ponies. It's too rough to ride."

For nearly an hour they blundered their way heavily up the canon and finally paused at a stunted white birch. Stone let out a whoop of delight.

"All right so far," he said. "Now let's try again. I'll roll three this time and keep check on you. The trail is rougher here. And with Edith tugging along at his side he headed up the valley."

"Sunk can," he said breathlessly. "I wonder why he wrote 'sunk can'?" He must have made a cache there."

"Where'd you get that word 'cache'?" she countered swiftly.

"Look here, Mr. Duro Stone... Mr. Hard Stone... You come clean with me. You can pull the

## CHAPPED SKIN? NO!

HINDS RELIEVES HANDS AND KNEES CHAPPED BY SNOW AND WIND

mane over Frank Crewe's eyes but... come clean with me. You're no amateur cow-puncher as you'd like us to think."

He studied her with glowing eyes. It was not at all unpleasant to shed that false identity with her. Yet... He could not tell her quite yet. Too, he knew that when she knew exactly who he was, she would be furiously angry. He considered that ruefully.

"Well..." He hesitated a little... "You're partly right, Miss... Edith..." He separated title and name so that he was calling her "Edith."

"I'm not exactly the amateur I posed for. Gerald Keene is my best friend. He learned at Calo from Mr. Burwell at the bank there that there was trouble down here with Dustin. He figured out that if he came down here he might not be able to find out exactly how things stand so we decided it would be best for me to come down and find out exactly what the trouble is and..."

"You mean..." The red head flung high in wrath... "You mean that you came as a spy in the camp to find out if the Hour-glass is honest..."

"Do I mean that? You listen to me, Edith Carr, and stop being a fool. I'm a western-bred man and I know my business. I know that a man does not tie to a man without reason. I know that when Peter Vinton took your father as his partner, old Joe Carr was a man worth tying to..."

"Her eyes lit at that with a different light and she even smiled a little."

"If Keene had come down here and all the world knew him as Gerald Keene how far would he have gone in getting proof of the crooked work of this man Dustin?"

"You mean that you represent Mr. Keene?"

"Exactly. But remember that no one else must know it. The whole thing will be clear on the tenth..."

When Keene unsmiles... "She studied him for a long minute. She noted the lean lines of the jaw; the quiet smoky-grey eyes shaded with hazel sparks. She noted the firm lips and the aggressive chin. Then she took in the rippling muscles from wrist to shoulder and the 'hour-glass' torso. She studied him but she said never a word. She merely nodded but that nod was one of complete and utter satisfaction. There was something about this man Duro Stone that gave her a sense of great relief. The third cigarette was all ash when he stopped and pointed to a pile of firewood turned earth."

"That'll be the sunk can," he said tersely.

She ran forward with a little cry and joined him as he stood over the place. The fresh earth had been heaped in a little pile that he promptly scratched away with both hands and feet disclosing an ordinary five-gallon can that was filled with charcoal. Edith looked at it unconprehendingly but Stone gave a little grunt of surprise.

He sat on a rock at her feet and in between puffs at that cigarette he studied her profile as she kept her eyes on the watch.

"Seven minutes and a half," she said finally. And neither of them knew that in those seven minutes Fate had dealt a new hand to them both.

"That's good. That makes about forty-five minutes up Red Water canyon to a white birch. While birches ought not to be very plentiful in this land. Let's go. We'll lead the ponies. It's too rough to ride."

For nearly an hour they blundered their way heavily up the canon and finally paused at a stunted white birch. Stone let out a whoop of delight.

"All right so far," he said. "Now let's try again. I'll roll three this time and keep check on you. The trail is rougher here. And with Edith tugging along at his side he headed up the valley."

"Sunk can," he said breathlessly. "I wonder why he wrote 'sunk can'?" He must have made a cache there."

"Where'd you get that word 'cache'?" she countered swiftly.

"Look here, Mr. Duro Stone... Mr. Hard Stone... You come clean with me. You can pull the

man over Frank Crewe's eyes but... come clean with me. You're no amateur cow-puncher as you'd like us to think."

He studied her with glowing eyes. It was not at all unpleasant to shed that false identity with her. Yet... He could not tell her quite yet. Too, he knew that when she knew exactly who he was, she would be furiously angry. He considered that ruefully.

"Well..." He hesitated a little... "You're partly right, Miss... Edith..." He separated title and name so that he was calling her "Edith."

"I'm not exactly the amateur I posed for. Gerald Keene is my best friend. He learned at Calo from Mr. Burwell at the bank there that there was trouble down here with Dustin. He figured out that if he came down here he might not be able to find out exactly how things stand so we decided it would be best for me to come down and find out exactly what the trouble is and..."

"Old Kane knows more than I gave him credit for," he said. "Did you ever read any surveying, Edith? No? I thought not... Well, I'll tell you something... Out in the West where trees are by no means plentiful, surveyors have to use the most permanent means they can to mark the claims they desire. Back East trees are used. Out here they have to use what they can get. They have found that charcoal buried in the place they want to mark, is the most permanent means. This can of charcoal marks a corner of the claim that old Kane had selected. He's run his lines from this can so as to include all the land he thinks has got on it. That's what he's after, of course..."

"I should have thought he would have described the claim in his notebook," she said.

"No... That's where he's wise. Don't you see? He's a partner of this man Dustin's and he doesn't trust Dustin. That's it. Do you happen to know whether this is Hour-glass land?"

"I am sure it is," she said. "Our lines run along that far crest... What's the matter?" she asked sharply. "What are you looking at?"

For Duro Stone, who had studied his craft from the catalogs of big department stores, was standing at gaze and his eyes were focused on a raw cut in the hillside not a hundred feet away from them.

He did not pause for explanations. He dived at that cut and disappeared in it and was back presently with both hands filled with great chunks of ore.

(To Be Continued)

### Exhibition Dates Set

Western Canada Association Holds Annual Meeting In Winnipeg

The most encouraging financial report in two years was laid before delegates to the Western Canada Fair Association annual meeting at Winnipeg by their secretary, Keith Stewart.

"With almost no exception, fair boards were well satisfied last summer and reported increased returns," he reported. "Everybody made a little money, more than the previous year," he said.

J. E. Lunney, director of the Regina exhibition, was elected president of the Western Canada Association of Exhibitions. J. E. Rette, Brandon, was elected vice-president.

Exhibition dates for next summer were set by the association: Brandon, July 1-5; Calgary, July 8-13; Edmonton, July 15-20; Saskatoon, July 20-27; Regina, July 28-Aug. 3.

### THE RHYMING OPTIMIST

By Aline Michaelis

#### TENT SHOW

How valiantly they pace these boards, How forcefully proclaim The power of right: what eager swords Flash forth in honor's name!

As night on night the audience, Entranced and breathless, waits, How well these players feign suspense, What evives, loves and hates!

Wind swells the canvas, great poles sway, Guys, creaking, strain and give, While not one scene the actors play Is strange as those they live.

By night, how many a lordly man, Great scholars, artists rare! By day, an out-of-towners' clan, Beset by want and care!

And still they go with courage fine And matchless gallantry To prove in glowing deed and line How splendid life can be!

Holidays In 1935

New Year's Day, the first holiday in any year, already has been enjoyed. Public holidays (some of them only bank holidays) to be looked forward to are these:

Good Friday, April 19.  
Easter Monday, April 22.  
Victoria Day, Friday, May 24.  
King's Birthday, Monday, June 3.  
Dominion Day, Monday, July 1.  
Civic Holiday, Monday, Aug. 5.  
Labor Day, Monday, Sept. 2.  
Thanksgiving Day, Monday, Oct. 7 (or 14).  
Christmas Day, Wednesday, Dec. 25.

Mrs. Hoods—"Why did Miss Oldmug discharge her gutterance?" Mrs. Woods—"Because he kept saying he had grown gray in her service."

It is not how many years we live, but what we do with them.

## TRY FASTER WAY TO RELIEVE A COLD

1. Take 2 Aspirin tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

### Discovery Bringing

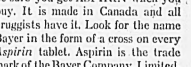

Almost Instant Relief to Millions

Follow Simple Directions: When you have a cold, remember the simple treatment pictured here... prescribed by doctors as the quick, safe way.

Results are amazing. Ache and distress go immediately. 'Because Aspirin's quick-integrating property, Aspirin "takes hold"—almost instantly. Your cold is relieved "quick" as you caught it!'

All you do is take Aspirin and drink plenty of water. Do this every 2 to 4 hours the first day—less often afterward... if throat is sore, the Aspirin gargle will ease it in as little as 2 minutes.

Ask your doctor about this. And be sure you get ASPIRIN when you buy. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

More Taxes

New Ways Of Increasing Revenue Considered By Quebec Government

New forms of taxation being considered by the Quebec government were outlined by Premier L. A. Taschereau in the legislative assembly as follows:

A tax on soft drinks.  
A tax of between five and 10 per cent. on large incomes.  
A tax on certain commercial operations.

A sales tax.  
An increase in the gasoline tax from six to seven cents per gallon, provided Ontario would agree to make a similar increase.

The veteran premier spoke at length following opening of the debate on the address in reply to the speech from the throne by Maurice Duplessis, K.C., leader of the opposition.

### BEFORE BABY CAME

Mrs. George Schumann of 128 Stanley Rd., Woodstock, Ont., says: "My strength was almost gone when I had the birth of my little girl. I couldn't sleep, did not care to eat and headaches were terrible. Two bottles of Dr. Pease's Favorite Prescription strengthened me. I continued in the best of health."

All druggists. New size, tablets 50, etc., liquid \$1.00. Large size, tabs, or liquid, \$1.35.

Pneumatic tires were invented in 1889 by an Irish physician who wanted to make a long bicycle ride to school more comfortable for his young son.

"He alone has lost the art to live who cannot win new friends."

## Do you waste Food?

Of course you don't waste food intentionally. But how much do you waste without knowing it?

How often have you thrown out part of a loaf or the remnants of a cabbage or even the dried out carcass of a chicken?

These and other left-over foods can be fresh to make tasty dishes if you keep them fresh—and you can keep all foods fresh by wrapping them in Para-Sani Heavy Waxed Paper.

Para-Sani has dozens of kitchen uses—lining baking tins, wrapping sandwiches, preserving the crispness of lettuce and celery. You'll find the self-cutting Para-Sani green box a great convenience and a real economy.

Send for "Tempting Tidbits made from Left-Overs"

This book contains suggestions for 100 delicious dishes—most of them made from scraps that would otherwise be wasted. Send for the latest from your Appleford Paper Specialty and we'll send you this valuable book free.

A Cooking Revolution Modern means more than just a new method when cooking fish, meat and vegetables because the Canadian way retains every bit of the delicious natural flavor, increases food value, and stops all odors.

## BUDGET PERCENTAGES

It is impossible to make a standard budget which will do for all families or for all times. As family incomes and standards vary, it is necessary to spend differing proportions for shelter, food, clothing and other items. Whether one is in a city or the country, makes a difference in the proportion of rent, food and clothing. Family needs vary with the age and requirements of the members.

One may often save on rent by living from the down town district, or in a less popular neighborhood or humbler house. One may save on food by using less expensive varieties, seasonal foods, nourishing substitutes for high priced foods in season.

The clothing budget may be large or small according to the standard of one's dress, care and duration of clothing, and whether it is home made or "ready-made".

As to furnishings and furniture, the ingenious person may make or adapt furniture from inexpensive materials, may recondition old furniture instead of buying new, or may get along with the old, as is. To buy labor-saving machinery may be economy from time, service and health considerations.

One cannot prosper without some educational and recreational outlays and the good citizen owes it to his community to help the church and charities. It is not economy to refrain from health care, as dentistry, eye-glasses, medical examination and needed operations. Prevention saves money in the long run, not to mention the comfort and possibly life itself.

In hard times one feels justified in merely "getting by" without allowing to be looking forward to old age, the rainy day, or necessary expenditures of the future, and to lay by something regularly with these in mind. Sacrifice is justified to save even a little each week. When you have saved it is sure to invest itself wisely.

An average guide for the normal budget might be: One-fifth for shelter, one-fourth for food, one-twelfth for clothing, one-fifth for operating expenses, one-twelfth for personal expenses, and one-tenth for savings.

## WINTER HEALTH

A committee made a study of thousands of school children over a period of two years and found that twice as many colds occurred in rooms with the temperature above sixty-five, as in rooms below that figure. The lesson is clear. If we would keep healthy, we must not live in overheated houses.

Winter is a great beautifier and health giver, if taken bravely, and in the open. Skin, eyes, nose, lungs become weak, if constantly in warm air. Hot baths should be avoided. The cool bath for normally healthy people, is invigorating, hardens the skin and membranes, and tones up the whole system, so that one is less likely to take cold. Begin with a coolish bath and gradually get accustomed to having the water colder. They tell us that in time we will love it. (Brrrrr!)

The same tonic effect is in cold air. The cold, pure air actually builds up the corporeal and makes one vigorous with life skin and a glow of health. To achieve this, do not wear a fur coat—except in extremely cold weather—but cover the body with light weight, wool clothing and his forth to walk. Breathe deeply and you will not feel the cold as much as if you took gingerly sniffs. The deep breath sends the blood coursing gaily through the body, and toes, nose and finger tips warm up. Take a walk or two out of winter. It is a pity to waste its advantages by hibernating in hot-house rooms, dashing from room to room, and never facing the weather.

## SCHOOL LUNCH

The ideal school lunch would be made of three sandwiches; one of meat, egg, fish, cheese or peanut butter; one of lettuce or salad; and one of jam, jelly or something sweet. Brown sugar or honey would do.

Besides the sandwiches there should be a cookie or a piece of cake; some fruit, preferably raw, as an apple or an orange; and a cup of hot cocoa or a glass of milk.

Rich cakes, doughnuts and pie should not go into the school child's lunch, though they are excellent for the working man. The child will go to sleep in school after such a lunch. Paper napkins, waxed paper to wrap each food separately, and paper dishes of all kinds are available now for a very small sum and add to the attractiveness of the lunch. See that everything about the lunch is scrupulously clean.

Mass at 9 a.m.

## PASSENGERS GET OFF LIGHTLY AS COACHES TOPPLE

## Broken Rail Turns Three Coaches On Sides Near Morrin

Twenty-three out of sixty passengers on board C.N.R. train near Morrin, were injured when the north bound train broke apart on Friday afternoon, three passenger coaches being turned over into the ditch. The injuries to practically all were more or less slight, but a half-dozen were removed for treatment in Drumheller hospital. Two factors contributed to the absence of loss of life in the accident. Engineer Alex McPhail reduced the train's speed when a herd of cattle appeared on the track ahead. Later, speed was again slowed down for a signal indicating that a section crew was at work on a stretch of line. Otherwise, this train might have struck the broken rail section at a much greater speed and loss of lives would probably have resulted.

At the time of the accident the thermometer registered more than 30 degrees below zero. Several passengers, following the coach, walked to the Morrin station, a distance of three miles. All those who were in the accident were loaded into the mail car and taken to Morrin where they were given shelter and attention by villagers.

## SARAH JANE'S BEDTIME STORY

By Grace McArthur

Hello, Children! I wonder if you will like this story about a girl and a boy who lived on the farm. They liked it fine in the summer when they could look out the window and see all the pretty flowers, and then go out and pick some for mother. There seemed to be all kinds of nice things to see and do, birds singing, gophers to tap and you know how it is, Children. Well, this boy and girl had never lived on the farm in the winter before, so they were very discontented when the bad snow storms set in and they could not go out to play. It was terribly cold and the windows were covered with frost. They had quite a number of toys to keep their minds occupied, but they seemed to have run out of amusement, and their mother was cross with them. "Now, Children, can't you find something among your toys which will be nice to play with?"

"We have played with everything," they said.

"But, mamma," asked the little girl, "What did you do when you were small? You can't even see out of the windows. Look at the frost on them."

"Oh! Now I know Children," their mother exclaimed, "speaking of that frost on the window reminds me of what I used to do when I was a little girl."

"Alright, just come up to this south window with me and I'll show you something. Now, look closely and see if you can see any pictures."

"Pictures!" said the boy. Gosh! that's frost. There's no pictures the e."

"Oh! that's where you are mistaken," said Mother. "See, look, follow my finger."

Then the mother traced a man with his hat falling off—right on that frost-covered window.

"Oh! Oh!" laughed the little girl. "Look, Mother, and there's a lady running away from him!" Then the boy began to look closely too, and he discovered a doggie and some trees. "Oh, and all kinds of different things."

"This is great," the children said. They were laughing and having great fun, for when they really began to look they found more and more things—some funny, some pretty and some cute. Those children didn't mind the frost on the window after that; in fact it was a treat to them and every day they would look at the windows, and there was frost on them they would tell Mother they were going to play their picture games. Then they would get a paper and pencil and write down everything they found and compare with the day before. It was great fun for them. Some days they would get funny things; some days, pretty ones, and so on.

Now, Children, I wonder if you have ever played that game. Try it next time old Jack Frost leaves his pictures behind him.

I do believe it is bedtime now, though, and I hope you liked this story.

Night, night, Children. Be good.

## Chinook Consolidated School Meeting

A meeting of the Board of Trustees of Chinook Con. S. D. No. 16 was held in the school on Wednesday, Jan. 23rd, at 2 p.m.

Members present—Messrs Bell, Rosenau, Dressel, Connor and Lawrence

The minutes of the meeting of Jan. 12th, were read.

Rosenau—that these minutes be adopted as read.

Dressel—that the following arrangements regarding driving be approved.

Route 3.—N Schmidt, Jan. 3, Feb. 15

" Jas. Young Feb. 18, March 15

" Reg Witt, March. '18, April 18.

Route 4.—D. Boise Jan. 3, Feb. 1

" P. Demaree, Feb. 4, till further notice.

Route 5.—Cooley Bros., Jan. 3, Jan. 11.

" F. Pfeiffer Jan. 14 Jan 18

" E. C. Pfeiffer Jan. 21, till further notice

Route 6.—H. D. Connor Jan. 3, till further notice

Route 7.—N. F. Marcy Jan. 3, till further notice

Route 8.—Gus Cook, Jan. 14, Jan. 17

" Aug. Rosenau, Jan. 18, Jan. 23

" Cooley Bros., Jan. 24, till further notice

Dressel, that in order to deal with any matter of an emergent nature in connection with driving the following committee be appointed.

For Routes 1-2 — L. Dressel  
Routes 3-4-8 — Aug. Rosenau  
Routes 5-6 H. D. Connor and  
Route 7 — R. V. Lawrence

Connor, that Lorne Proudfoot be continued as Secretary Treasurer at the same salary

Lawrence-Dressel: That a resolution similar to resolution No. 20 of Jan. 14th, 1933 be passed authorizing the Bank to accept the names of Daniel Bell and Lorne Proudfoot as Chairman and Sec-Treasurer of Chinook Consolidated S. D. No. 16

Dressel: That in view of the fact that two meetings have been held for the purpose of electing a trustee for Carpathia S. D., and an insufficient number of electors have been present at such meetings to nominate a trustee the Dept of Education be requested to continue in office. R. V. Lawrence, for the same term as he had been elected

Rosenau, that the estimates for the year be as follows:

Expenditures

Teachers salaries	3800.00
Officials salaries	285.00
Debt service payment	907.50
Van driving	6000.00
Grounds, Bdg	150.00
Supplies etc.	350.00
Caretaking	600.00
Fuel	350.00
Other expenses	500.00
Total	12942.50

Receipts

Government grant	3000.00
Rent of school	75.00
Tuition fees	100.00
Taxes collected	10000.00
Total	13175.00

Lawrence, that tax rate for the year be 25 mills, the same as last year.

Dressel that a 5% discount be allowed on all current taxes paid before July 1st.

Rosenau, that the present caretaker be offered a salary of \$600.00 per year and in the event of this being not accepted tenders be asked for the position, such tender to be in by Friday, Feb. 1st, the lowest nor any tender not necessarily being accepted

Lawrence, that we do now adjourn to meet again at the call of the Chairman.

Lorne Proudfoot  
Secretary

## ADVICE TO GARNET GROWERS

Beginning August 1st, 1935, the Dominion Government has made provision for the separate grading of Garnet wheat. The price that will be paid for this variety will be governed by the demand. If the demand is not closely related to the quantity produced, there may be a reduction in price which will make it unprofitable to grow the variety. The most profitable variety of those recommended in Alberta can only be determined by the farmer himself.

Farmers who intend to grow Garnet for another year will be well advised to make preparations to have seed of some other suitable variety ready for seeding in 1936 in the event of prices for Garnet being too low for profitable production. A good plan would be to obtain a few bushels of certified Heward or Red Bobs 222 in the spring of 1935 and sow it on clean summer-fallow land or breaking. In some districts Garnet could be replaced with Marquis, in which case registered seed should be obtained. Then if the grower wishes to discontinue growing Garnet, he will have on hand sufficient seed of a good variety for every farmer. The cost of changing to a new variety by this method should be within the reach of every farmer. If such a plan is followed great care should be taken that the new variety selected does not become mixed with Garnet.—Dr. O. S. Aamodt, in Alberta University P. C. Bulletin

## ONE TO THE GOOD

A certain Oxford professor, notorious for his absent-mindedness, returned from church one Sunday morning triumphantly waving an umbrella.

"Well, my dear," he said to his wife, "you will kindly observe that I have not let it behind in the par today."

"No," smiled the wife, "the trouble is that you didn't take one with you. You'll find you're in the hall."

The regular meeting of the Chinook Womens Institute was held at Mrs. Otto's home on January 30, Mrs. Bennett being assistant hostess. There were twelve ladies present. After the opening exercises, the annual card party and dance was discussed. This will include a domino tournament and the date is set for February 15.

Arrangements were also made for the preparation of a "mothers bundle," this takes the form of a complete layette for a needy baby.

Mrs. Wilson gave a splendid paper on "The progress made by the League of Nations."

A contest put on by Mrs. Bennett was won by Mrs. Rideout, consolation by Mrs. Shier.

## The Ottawa Letter

(By "M.L.B.")

OTTAWA, Jan. 18.—The sixth and final session of the twentieth parliament has been launched with the unusual ceremonies but is unique in being the first of such events to be broadcast. For the first time millions of Canadians were able to hear the speech from the Throne as well as a description of the more colorful aspects of this interesting occasion, and if this contact brings home to them their personal concern in the proceedings of their federal government the Canadian Radio Commission will have done their good deed for 1935. Broadcasts direct from the House of Commons will be a new step.

Very few parliaments have completed their possible five years, so this session will be unusual in being indisputably a pre-election one, and much of the election campaign will be fought on the floor of the House. This situation will be intensified by the complicated political developments of recent months and no one is attempting definite predictions of what will happen. In Ontario the reactions to the Prime Minister's broadcasts seem to be rather favorable than otherwise but indications are that in Quebec the reverse is the case, that province being particularly sensitive to any hint of amendment to the P.N.E.U. No one who has watched the Prime Minister in the House since 1930 should be surprised at the decisive step he has taken in his broadcasts. The leader of the government is not a man to take possible defeat lying down and the apparent lack of alarm in Conservative ranks over Liberal victories in provincial and by-elections indicated that he had "something up his sleeve" to be produced at the psychological moment. If the new voters' lists were ready it is conceivable that the Prime Minister might take up the challenge which Hon. Mackenzie King said he intended to throw down early this session, and appeal to the country at once, even though a winter election is impractical in this country. But the lists are not ready, and the Prime Minister's recent statement that legislation along the lines of his broadcasts would be enacted before asking the electors for a mandate to carry on, discounts all predictions of a brief session. The situation is intriguing, and even Ottawa, usually so indifferent to what goes on in the House after the gold lace and high hats, ceremonies, with their attendant political functions, are over, is showing some interest in the proceedings to come.

Every day brings fresh political news, a last minute happening being the recognition of the Speaker, Hon. Geo. B. Macdonald, by sudden illness. The Deputy Speaker, Hon. Armand Lavigne, has been indisposed for some time, his affliction preventing his attendance in the House almost since the opening of the session, and his absence has left the House in a state of uncertainty as to who would take the Chair at this time was not only a subject of regret in the House but a source of embarrassment to the government on the eve of assembling.

In this emergency the opening ceremonies had to be delayed for half an hour while a new Speaker was sworn in, J. L. Bowman of Dauphin being chosen for this honor. It is a rather extraordinary experience for a member in his first term in parliament, arriving at the last moment for the opening, to find himself donning the robes of office—literally, in this case—and playing a leading part in this elaborate ceremonial. To Mr. Bowman, coming from the pioneer West where ceremony is little observed, the knee breeches, silk gown and three-cornered hat worn by the Speaker must have added not a little to the difficulties of his unfamiliar task. But the choice of Speaker would seem to be a happy one. Mr. Bowman is a level-headed, experienced, and a good grasp of national problems and what is important to the gallerist) possessor of a distinct speaking voice.

The House opens with numerous other changes since adjournment last July. Four members, one Liberal and three supporters of the government have passed on since last session: J. A. Denise, Quebec, Hon. W. A. Black, Halifax, oldest member in the House, G. B. Nicholson, Algoma East, Ontario, and Dr. Cowan, Long Lake, Sask. The veteran member from Long Lake was quite a character in the House. Re-elected in 1880 he returned with a tremendous physical handicap but with his fighting spirit undaunted, and was always ready to do battle for his Conservative principles and his beloved pioneer west. He was a staunch champion of the Hudson Bay railway and any reflections on the building of that road brought him to his feet in vehement defense of the undertaking. In faithful attendance Dr. Cowan was an example to men handicapped members, and he will be missed in debate.

Five members take their seats this session, four Liberals and one Conservative, but the latter is "Tommy" Church, a host in himself. Seven times elected Mayor of Toronto and several times Member of Parliament, Mr. Church is typical of himself and after several years' absence from the House can be counted on to give his views of the political situation. Like several other members of the House, he has never had the benefit of the gentle criticism of a better-half! With Mr. Church on one side

## THE CHINOOK ADVANCE

Car of Block Wood Just Arrived  
M. L. CHAPMAN, Chinook

and Mr. Pouliot, irresponsible member for Temiscouata, on the other, predictions of a brief session seem the ultimate in optimism.

The outstanding change in the House is, of course, the resignation of Hon. H. H. Stevens as Minister of Trade and Commerce, although that event has lost some of its implications by recent developments. Hon. Grote Stirling, Member for Yale, is now British Columbia's representative in the cabinet, as Minister of Defence and Fisheries, while Hon. R. B. Hanson of New Brunswick has taken over Mr. Stephens' work as Minister of Trade & Commerce. Rumors that the latter appointment is only temporary paves the way for Mr. Stevens' return to his former position. It is said Mr. Hanson will retire from Politics at dissolution of parliament to accept a judicial appointment in his own province.

It is pretty well known that the Senate, the Bench and commission chairmanships will absorb some half dozen of the present cabinet, several of whom have served their terms of facing electors, and that will leave room for new timber, probably more in accord with the Prime Minister's new plans. The big question is, how will the Senate view the proposed legislation? Various speeches made by Hon. Arthur Meighan during the past two weeks would indicate that he too, has become convinced that the social and economic adjustments are overdue, and there is no doubt the Senate leader's opinion carries weight in the Upper Chamber.

No slightest word has been heard from Hon. Mackenzie King and his supporters as to the line the official opposition will take in the new situation, but doubtless this will become apparent within a week or two. As leader of the third group Mr. Woodsworth has declared that the C.P. will support the Prime Minister's social legislation insofar as it conforms to plans advocated by that group for several years, but he does not agree that the capitalist system can be reformed and repaired to function satisfactorily under modern conditions.

Last session saw the enactment of legislation more far-reaching in its effects, and more directly vital to the whole country, for well or ill, than anyone session in many years, and never have the galleries of the House been more consistently empty. This year of an election, with a tremendous political battle before the series will undoubtedly be well filled. It is only the politicians who regard politics as a game?
